

Device Requirements

<p>Windows Tablet</p>		<p>Minimum 10 inch screen Please check the device has a camera as it is used extensively for tasks. A number of our current Stage 3 students have an external mouse to use with the tablet. This offers flexibility with how the device is used. You might like to consider purchasing one. Most come with a keyboard. Touchscreen is very highly recommended.</p>
<p>Operating System</p>		<p>Windows 10</p>
<p>Stylus</p>		<p>Highly recommended but not essential.</p>
<p>Software</p>		<p>Most devices will come with Microsoft Office – however please do not purchase it separately as you are able to access it free via our school account with Office365.</p>
<p>Folio (case)</p>		<p>Students need to take care of their equipment. School bags will potentially become lighter due to the reduction of physical books but extra care is essential to ensure that the tablet remains in good working order.</p>
<p>Extended Warranty</p>	<p>Most devices come with one year warranties. It is highly recommended that you seek extended warranties with your supplier.</p>	
<p>Accidental Damage Protection</p>	<p>Please seriously consider this, it is highly recommended – especially with a number of current students experiencing cracked screens. It is costly to repair a screen. Studysure is one example of a company that offers this insurance.</p>
